RentCoin ($RENT) Litepaper

Rent or mortgage, it's always due. RentCoin for everyone skint by the 15th, with daily, weekly and monthly giveaways to help people with their housing costs.

What it is

RentCoin ($RENT) is a community meme coin on Solana for anyone who feels the squeeze when rent or the mortgage comes due each month. It doesn't do anything clever: it's a shared joke, a community, and regular giveaways that help people with their housing costs. It is not an investment product.

Tokenomics

Item	Detail
Chain	Solana
Token type	Custom SPL token (not a pump.fun launch)
Total supply	1,000,000 $RENT, fixed
Mint and freeze authority	Both revoked at launch, so no more $RENT can ever be created and no wallet can be frozen
Liquidity pool	750,000 $RENT (75%) paired on Raydium; the LP tokens are burned, so the liquidity can't be pulled
Dev holding	250,000 $RENT (25%)
Presale	None
Contract address	TBA. Only trust the address posted on our official socials

Dev allocation lock (proposed): we propose locking the dev's 250,000 $RENT with a public token lock service, released linearly over 12 months as monthly unlocks (roughly 20,833 $RENT a month). The lock provider, start date and lock link are TBA and will be posted before or at launch. Until the lock link is published, treat the lock as a plan, not a fact.

What leaves the dev holding each month (maximum 7,500 $RENT):

Use	Up to, per month	Paid from
Giveaways	5,000 $RENT	Public giveaway wallet
Dev's personal take, disclosed openly	2,500 $RENT	Public dev wallet

Unlocked tokens that aren't used stay in the dev holding. At the maximum rate, the 250,000 would last about 33 months. These are caps, not targets: some months may use less.

Wallet transparency: the dev wallet and giveaway wallet addresses will be public, and every movement (buy, sell, transfer, unlock claim or payout) will be shown on the site dashboard with its transaction link.

Giveaways

Up to 5,000 $RENT a month from the dev allocation goes to giveaways, paid from the public giveaway wallet:

Draw	Prize	Roughly per month
Daily	about 100 $RENT	~3,000 $RENT
Weekly	250 $RENT	~1,000 $RENT
Monthly	1,000 $RENT, towards one person's rent or mortgage	1,000 $RENT

- **Free entry:** join the $RENT Telegram group (link TBA). No purchase needed, and you don't need to buy or hold $RENT (as UK rules on prize draws require).
- **Draw:** winners are picked with a random draw held live in the $RENT Telegram group so anyone can watch.
- **Proof:** every payout is posted on the site dashboard with its on-chain transaction link.
- Prizes are paid in $RENT, whose value can go up, down or to zero. The giveaway is not a return, a dividend or a reward for holding.

Roadmap

1. **Community building:** grow X, Instagram and TikTok, and publish the wallet and lock plans.

2. **Launch:** create the SPL token, revoke mint and freeze authority, add 750,000 $RENT to a Raydium pool and burn the LP tokens, post the contract address, set up and publish the dev lock, and list the wallets.
3. **Giveaways:** run daily, weekly and monthly draws with free entry via the Telegram group, live draws in the group, and posted transaction links.

Risks

Meme coins are highly speculative and volatile. Liquidity may be thin. The dev holds 25% of supply (250,000 $RENT). The dev may sell up to 2,500 $RENT a month, and giveaway winners may sell their prizes, which could push the price down. Smart contract, platform and wallet risks exist. Scammers may impersonate us. Rules may change by country, and giveaways may not be open everywhere. The project may be discontinued.

Disclaimer

$RENT is for entertainment only and has no intrinsic value. Nothing here is financial, investment, legal or tax advice. It is high risk: you could lose everything, and the token can go to zero. We make no promises of profit, price or returns. Never spend money you need for rent, a mortgage or bills. Do your own research and follow your local laws.
